Swag Labs - Test Execution Summary Report	
Project Name:	Swag Labs E-Commerce Testing
Tester:	Oshini Poornima
Test Date:	January 10, 2026
Application URL:	https://www.saucedemo.com
Test Execution Metrics	
Total Test Cases Written:	6
Total Test Cases Executed:	6
Test Cases Passed:	6
Test Cases Failed:	0
Pass Rate:	100%
Bug Summary	
Total Bugs Found:	2
Critical Bugs:	0
Major Bugs:	1
Minor Bugs:	1
Bugs Status:	All bugs documented and open for development team review
Test Recommendation	
The core user journey (login, add to cart, checkout) is fully functional and passes all test cases with a 100% pass rate. The application is stable for the standard_user account.	
However, 2 bugs were identified when testing with the problem_user account: incorrect product images (Major severity) and delayed button response (Minor severity).	
Recommendation: The application is ready for release for standard users, but the problem_user account issues should be fixed in the next sprint to ensure consistent user experience across all accounts.
